Supply Chain Management Reimagined:

Experience unparalleled efficiency with Artintech ERP's Supply Chain Management (SCM) system. Our SCM module ensures your business adapts swiftly to market changes and customer demands, maintaining a competitive edge.

Who is this for?

The SCM solution caters to Supply Chain Managers, Procurement Officers, Warehouse Supervisors, Distribution Coordinators, and Logistics Analysts - professionals dedicated to optimizing the supply chain from procurement to delivery.

Essential Supply Chain Management Modules:

Procurement: Simplify vendor relationships and purchasing processes.

Warehousing: Real-time inventory management and order fulfillment.

Shipping & Distribution: Efficient logistics, timely delivery, and cost reduction.

Supplier Management: Maintain robust supplier performance and relations.

Sales CRM: Elevate your B2B sales process, from managing sales orders and customer relationships to analysing your sales performance.

Invoicing: Streamline your invoicing and billing processes to ensure accuracy, reduce administrative overhead, and improve cash flow management.

Task Scheduling: Organize and prioritize SCM-related tasks, ensuring nothing is overlooked.
