## FIELD SERVICE MANAGEMENT REIMAGINED:

Artintech FSM redefines field service management by integrating cutting-edge technology with user-centric design. We provide a 360-degree view of your operations, empowering your team to anticipate needs, optimize workflows, and maintain equipment at peak performance.

## WHO IS THIS FOR?

Artintech's Field Service Management Software empowers the professionals who keep client assets running—Operations Managers, Technicians, Admin Staff, Sales, Customer Service, and all team members involved in service delivery.

## ESSENTIAL FUNCTIONS:

**Asset Management:** Keep a detailed record of all client equipment and assets, including service history, performance metrics, and warranty information.

**Work Order Management:** Generate, assign, and track maintenance work orders with ease, ensuring timely completion and accountability.

**Preventive Maintenance Scheduling:** Automate the scheduling of routine checks and maintenance tasks to prevent equipment failure and extend asset life.

**Inventory Control:** Manage parts inventory efficiently, eliminating service delays due to parts unavailability.

**Compliance Adherence:** Ensure all maintenance procedures are in line with industry standards and regulatory requirements.

**Automated Billing:** Automate client billing effortlessly by capturing every item in your work orders—ensuring no detail is missed.

**Digital  
Transformation**
